

IN THE CLAIMS:

Please amend the claims as set forth below.

Applicants present a **clean version** of all pending claims in **Attachment A**.

Please amend claims 1, 11-16, & 19-20 as follows:

1. *(Once Amended)* A system for the delivery of voice messages to a voice service subscriber using voice commands, comprising:

a call server, the call server initiating an outbound communication to a voice service subscriber to commence a voice service session;

 an input module, the input module sensing a voice input command from the subscriber during the voice service session; and

 a content delivery module, communicating with the input module, the content delivery module selecting at least one of a plurality of voice messages to deliver to the subscriber according to the voice input command.

11. **(Once Amended)** A method for the delivery of voice messages to a voice service subscriber using voice commands, comprising:

initiating an outbound communication to a voice service subscriber to commence a voice service session;

[(a)] sensing a voice input command from the subscriber during the voice service session; and

[(b)] selecting at least one of a plurality of voice messages to deliver to the subscriber according to the voice input command sensed [in step (a)].

12. **(Once Amended)** The method of claim 11, wherein the step [(a)] of sensing comprises a step of [(c)] converting the voice input command to digital voice data in an analog to digital converter.

13. **(Once Amended)** The method of claim 12, further comprising a step [(d)] of storing the digital voice data.

14. **(Once Amended)** The method of claim 13, further comprising a step of [(e)] discriminating at least one of a plurality of predetermined commands according to the digital voice data.

15. *(Once Amended)* The method of claim 14, further comprising a step of [(f)]
presenting the subscriber with voice message content according to the digital voice data.

16. *(Once Amended)* The method of claim 15, further comprising a step of [(g)]
presenting the subscriber with at least one voice command prompt to query voice input from
the subscriber.

19. *(Once Amended)* The method of claim 11, further comprising a step of [(h)]
authenticating the subscriber for receipt of the voice messages.

20. *(Once Amended)* The method of claim 19, wherein the step [(h)] of
authenticating comprises at least one of prompting for PIN validation and voice identification.
